Hello, I have had several people tell me they think it is possible but they dont know how, and several people tell me they are pretty sure it is impossible.

I want to create a base gate. I have seen working basegates in levels such as oasis flying. My base gate I want different. I want my basegate to be team specific so that only one team can open it. However, now that only one team can open it the other team needs a way through. I want it damageable, repairable, and destroyable.

To sum up I want a basegate that works for only one side that can be destroyed like a building. I hope this is possible and I hope someone can tell me how. Thanks a bunch.

Bret Reese
