loser99It is DAMN obvious that some people are cheating on the server, can you just ban these people for the love of god? When someone has 1000 points in the first minute of the game and everyone else has max 10 points hes cheating, its just not possible to be that good, so I dont want to here any of this bullshit requests significant prood, this game is DEAD right now, NO ONE CAN PLAY SO DO SOMETHING. RenGaurd is taking way to long, you have got to do something, because whoever is running a server with cheaters on it is running a server that is a JOKE

umm those servers WHO do HAVE admins.. are working hard to keep them all banned.. but we all have lives and cant sit on the server all freaking day watching out for cheaters...
we exchange names and IPs to keep them banned from 60% of the servers.. the mains ones anyway.. thats the best we can do..
