This plugin works like the Character Refund plugin but this one should always work. If a player buys another character without dying he'll be refunded a configurable amount of money.

You can contact me under the nick 'iRANian' on renegadeforums.com.

To install place 'CharacterRefundKebab.dll' inside the root FDS folder and add an entry for it under the [Plugins] section in SSGM.ini, then add and configure the following to SSGM.ini:

[CharacterRefund]
FractionOfRefund = 0.5 ; 0.5 gives a 50% refund
