[UNABLETOREPRODUCE] - Playing in multiplayer then single player causes bogus credits display (jonwil)

NOT TRUE.. I'm not sure what specifically is happening in my server but as soon as I read UNABLETOREPRODUCE I was a bit like

So I booted up my server I entered. Was in there for like 10 seconds I pressed escape then pressed quit. I 'quit' my server aswell. I go to the home menu I press Singleplayer, then Commando difficulty. I'm in intro cinematic and I get this! See screenshot.

Sorry that I'm in windowed mode I couldn't make a screenshot of my Renegade without that, somehow it took a screenshot of my desktop then. (BTW I have 2 screens that's why you see a part of the desktop on the left side)

JonWil or somebody else I can give you my source/server file settings if you want.
