Subject: Re: Question about video rendering
Posted by BoMbZu on Mon, 30 Jul 2012 09:33:54 GMT

I played arround with the settings again. I really have lost all sense about different video formats, aspects ratio's and codec compression at this stage but when I put the settings like this:

Custom dimensions H: 800px W: 450px, Aspect ratio: Square pixels 1:0 the video comes out fine.

Thanks anyway EWD
