Hello people,

as some of you may know we are running a new maps server with only new maps in rotation which has become quite a success lately with often having more than 20 people in there.

However, we seem to be attacked by someone every evening now it seems and all players lose connection to the server.

I'm getting a little bit tired of it now to be honest lol.
I don't know who is doing it either.

Does anyone know of messures i can take to maybe stop this?
Jelly(raven) has alrady given me snort and some tool for xwis but they dont seem to work against this guy.
At least not in its current configuration. If anyone has ideas please let me know

So fucking sad really that people attack the server, if you happen to know who it is, you dont have to tell me or anyone about it but just tell them to stop. Thanks.

Anyway, if there is anyone with ideas please let me know.

Thanks.
