Subject: Black Screen on 4.0
Posted by Dave2916 on Fri, 21 Dec 2012 21:33:23 GMT

Hi

Isolated the problem down to 4.0. After I install it I get a black screen when starting Renegade and a non-responsive program that needs to be shut down via task manager.

It's weird because Renegade always worked fine on this installation so I have tried reinstalling from scratch. Even got 3.4.4 working after replacing the bandtest.dll but still dribbling everywhere sadly.

Any help appreciated.

I would be willing to let a trusted member remote support me if needed.

Cheers!
