In addition to Norton/Symantec it would seem Avast may block installation as well. If you're running Avast and are unable to install, please disable the AV during the installation process.

If a mod could update the FAQ, it would be appreciated. I can no longer do this myself D:

FAQ Update:
Quote:I'm trying to install but it fails. I'm running Norton/Symantec anti-virus software
- Completely disable the AV and try again. If it still fails, please create a topic in this sub-forum.

Quote:I'm trying to install but it fails. I'm running certain anti-virus software (see list).
- Completely disable the AV and try again. If it still fails, please create a topic in this sub-forum.

Known to cause problems:
 Norton (confirmed)
 Symantec (confirmed)
 Avast (possibly)
