alright...

now its just going to be Renegade more advanced! heres a little info im making a writeup but its not done!

Time: 50 years after cnc renegade

This mod is a total conversion of the Original CnC Renegade Game! it takes place 50 years after the Renegade game, The Units are more advanced! There will be machines and Humans Working together to defeat the evergrowing forces of Nod which also have much much more technology! Havoc and Dead 6 will be replaced I was actually thinking that Havoc was such a good commando that GDI decided to build a prototype of him! so Havoc would be remade so he had robotic arm likes the alcolote and other Robotic parts! maybe with a little higher jump and a bit faster and same goes for Sakura! The Tanks wouldnt go the same way they would be whole new tanks and vehicles, i was thinking maybe even a modified VTOL F-18 Hornet which would be cool!

Right now i dont think i will abandon this mod, so far i have 2 skimmers and 1 mapper! and i really need modelers! I think it would be cool!

[EDIT] the site had some downtime but it works now
