The hostname which RenCorner Marathon is sending is empty. Doesn't seem to be a BRenBot issue, just a configuration one as other servers running BRenBot show up fine.

There are three requests:
1. Allow the 'gametype' option to be configurable, at the moment it always sends 'C&C'. Dragonade 1.5 already allows this and hifi might add support for displaying it in the online server list.
2. Add player kills/death/time to player info.
3. Add two fake players Nod and GDI with team score/kills/death.
