Thx for that link roszek.
But this also doesnt excactly answer my Question, i was wondering if it is a Bug that it switches
back to your old Serial even tho u edited it before in registry, or if TT was originally made to do so.
I could also just simply reinstall Renegade, but i would like to know if i have to or not in case i
want to use a different Serial...
It's likely that either you didn't change your serial in the right place or that you didn't
delete/recreate a certain file that's necessary for serial decryption.
