HKEY_CURRENT_USER\Software\Westwood\Renegade

Like you could ever hide if one of us felt like searching. Jesse thought his little serial changer/vpn could hide him, found his shit in less than a minute.

Thats not new to me shaitan, my Post was actually more related to the fact TT changes the serial back to the one you used by installing even tho u edited it in the registry. But as i said, i already got my answer to the question.
