If you think Renegade is dead, why do you feel you have to CONVINCEN us of this and try and make us leave? If I feel like playing, I'm going to click the icon on the desktop and play it. If you don't feel like playing it anymore, than uninstall the game, remove these forums from your bookmarks, and never come back. It's VERY simple.

We're going to either play Renegade if we want to, or not play Renegade, and you're not going to change that with the simple "reasoning" that the game is dead.

If YOU want to play Halo, then go play Halo and leave us alone.
