these devs are very committed to this game, i usually am able to talk to them whenever, very good support.

bonuses are they let you test patches, we had a patch a week ago, but in the week before they put out beta1 for us, then beta2 and beta3. then the patch came out.

Also there is no real online tutorial, you can go read forums or go to <http://www.3dactionplanet.com/savage/> there are something to help new people and stuff.
