Sir PhoenixxAround 50k would be great...

Just delete like every other frame or so (like: 1, 2(delete), 3(delete), 4, 5(delete), 6(delete) or: 1, 2(delete), 3, 4(delete), etc.)

So that it looks choppy at the frame rate it's going at now, and speed it up a little so it looks less choppy...

You could also make it shorter, so that the text just fits inside it...
etc.

I just speeding it up and making it less choppy but it ended up just around the same size I think the current one will be alright then...

Thats it for now then.
