---

FalconxIHourglass.

I was a Raveshaw at the tunnel entrance in our base. I see a Engie comming from around the corner. I wait a few seconds and pop out and fire. The round goes through him and the 3 other engies in line behind him. They though it was c4 at first.

Never had anything that good since.

ROFL! 4 kills with one shot

I myself once killed two mutant Raveshaws (i.e. with the alt. skin) with one b headshot from my \$500 sniper rifle. I was on 56k back then, my FPS was quite horrid, and it was across the Nod base. I was on the HoN side of the Nod base on Mesa, by that ramp, and the Raveshaw's were across the base at the Nod PP...

Another one was on C&C\_City\_Flying. I was Nod, and GDI's AGT was down. I was a Sakura and was shooting from the roof of the WF. After a while two pissed GDI's come on the roof and start attacking me. I fail to kill them initially, until I managed to kill both of them with one shot, while they weren't lined up! It was probably lag, but on my screen one of the two was about a meter more to the left than the other one...it was very strange.
