<http://www.servermatrix.com>

Has dedicated servers with 1000GB of transfer monthly starting at \$99 (or \$79 with a setup fee) for Windows machines. If you wanted to run it on GameSpy with the Linux FDS, you can get one of their servers for \$59/month or \$49/month with a setup fee.

A lot of us are running game servers with these guys, including The Pits, the n00bstories AOW server, FoD Server 1, and a couple others.
