my best shot ever was complete and utter luck, and it was like a year ago too. I was on field, and I was a sakura killing the gdi people that were attacking the airfield throught the back tunnel. They were doing a rush on the airfield, and i popped up and took 1 shot at a havoc, it went throught havocs head, into a gunners head(who was directly beind him), then redirected into 3 grenadiers . I went into l33t shock and passed out.

oh, and this happened a few times too. I'd be shooting a tank with a sniper, and then another tank would blow it up just before my bullet hit it, and i'd kill the guy inside. That's kinda luck too...
