DanteBlazerpardon my french, but thats fucking bullshit. "don't have means to check the system"???? What the hell. There has to be SOMEONE who maintains the servers, whoever the guy is who reboots it when WOL goes down etc...FIND THAT GUY...FFS...damn red tape.

Janitor = guy who reboots, when he trips over teh wire whilest mopping, he then plugs it back in, wala... WOL reboots.

Must have been spring cleaning last week?

oh that is great.....
