BlazerThere has always been a !page command in brenbot, its in the !help and everything From irc you just do !page playername blah blah blah...

As for !rape etc, I prefer not to add anything that can be used to spam the server with.

Hey Blazer,

I get the following from a !version

I'm running brenbot 1.31 MSWin32.

and I dont see a !page command, and !page help says

[BR] No entry for page found.

is there something I need to do to enable !page? Or do I need a differant version?

thanks
