Subject: Stop blaming the host for lag :)
Posted by gibberish on Wed, 11 Feb 2004 02:03:14 GMT

Crimson you missed one cause of lag:

Players with exceptionally high pings (> 1000).
When one of these players joins the game it is noticable.
When I kick them the lag goes away.

I would also recommend only playing on Dedicated servers for the following reasons:

1.> If the server is not dedicated and a low spec machine it can have trouble handing the game and the graphics.

2.> A lot of non-dedicated servers simply don't have the bandwidth for the number of players they try to support.

3.> Playing against the host sucks, as they have a massive advantage especially when it comes to sniping.
