Discribe your problem better!!

Ive run al OS's so i know a big deal of it...
(yes, i dont know everything! )

What you might try (only for 2000 and XP):
Set your pagefile.sys to another drive, if the drive that hold this is full your can get crashes or
other weird messages. Normally this file should NOT be on your sys partition!

Recommended Filesize:
Minimum: System Ram + 11Mb
Maximum : System Ram +/- 256Mb

Good Luck,

Timoos.
