Demolition manSeaManTitan1x77umm whats this quake 3 mod??

Well, it was a Renegade mod for Quake 3.
It was hosted at Eclipse mods.
But the mod apparently died together with the Eclipse network.

All the pictures are already up, but I need to add them to gallery database.I still got those mod files somewhere=o

I had the beta and i remember some old ren fanboys whine about that lol.
Those pics u got look more shitty then it was tho. It didnt look great tho but it was fun to play.

Find it and upload it or contact me on AIM or MSN...I'd like to have a peek at it.
