guys, IDEA just for u!
i realize some things are just too painsstaking to code into renny, such as dogs and airplanes, but wat about harriers? (sry bout the spelling)
harriers can be vertical takeoff and landing, and i noticed noone has made, or even mentioned making one
other ideas 4 you: (not that ne one cares)
mirage tanks-fun, gdi's answer to stealth (would need more forested maps)
possibly mind control-within range, you control the person for about 30 secs, but leave yourself open
spys
theifs
ill brb to post more, lunch period is here
