CrimsonSorry, I was under the impression that you created the wallhacked maps you sent us. The problem with cheats, ANY cheat... is that they start by just being sent between friends, then one day appear on someone's web site. That's why if someone ever creates some way to get around RenGuard, it won't take long for us to get the program, find out how it works, and fix it.

That's wonderful, but you make the assumption that not caring about RG is the same as wanting Renegade to die (which it is close to doing, anyway). RenGuard is the apparently incomplete program which was created by the "software company" which you folks have started. Just because you control many servers, but not ours, doesn't mean that I hate Renegade - It means that I don't like your program. Here, I'll put it simply for you: RenGuard != Renegade
