Umbral_DelaFlaredrkhazeYet you omitted the fact that you'd tested it in another public server until scrumfy pointed it out himself? Plz, tell the whole story the first time.

We can also tell the whole story on how you used a WS exploit to gain access to a server admin's name and wreak havoc.

Which has relevance to what here?

Also, I don't call 2 seconds in a server "wreaking havoc".
