Mismatch means your version isn't the same as the server's your trying to play on

hence the name mismatch

This happened to me you can do 1 of 2 things

1: go to start

programs>westwood(or wat ever folder renegade is under)

once in that folder youll see

Read me, unistall, renegade blah blah blah click on the one that says

Renegade auto update it usually dosent work for me but it might for u

2: which is wat i had 2 do

Totally uninstall renegade and the next time you go to run it (after you have reinstalled it)

Just act like everythings fine

Once you click on advanced game listings and its trying to connect you itll ask if you want to upgrade to the newest version (Click yes)

Lemme know if something goes wrong :bomb:

!@#%&\*(partiiman)\*&^%\$#@!
