Subject: Pure mode
Posted by Casato on Tue, 13 Apr 2004 03:47:44 GMT

Allo all,

Just wondering... Perphaps Crimson and mac would would be kind enough to implement a feature that detects whether or not a server is running pure mode. If it is, it renames all skins to something that rendesr them useless (ie for "hud_main.dds" it could be "hud_main.dds.rg") and then block any that are then renamed to .dds as cheat files. Obviously when exiting a server RG would rename the fiels back to a useful form.

Hope this is possible, Cas
