IRON-FARTTThis is ANCIENT!

But works better with a Tech. If you are a Tech, you can disarm any mines, and there will be no warning or a nuke. Also I find that if you put a timed C4 on the buggy and get a refill just before you leave there will be no way of telling that you were ever there if someone just looks over to the ref. Unless you were spotted going to it or spotted inside.
Throwing 2 remotes, then refill then jump is much more reliable and you probably wont blow yourself up
