I take it there will also be a fix to stop the lag renguard causes
my cpu usage goes over 50 % when renguard launches

I doubt it, thats when renguard does its stuff.
It has to validate all the files in your renegade directory.

I assume from the fact it only went to 50% that you have a Pentium 4.
The Renguard team may be able to fix that, ..... so that it goes to 100%
