maybe if you put your mouse over MapPack you would find a link. Duh.

Also, there is no javascript on my site, honestly, i don't know how to code in javascript.

As far as color contrast, do you need glasses, you are the only one to complain about reading.

As far as getting back to the main site, have you ever heard of the back button?

My site is focused on our clan. Yes that is our objective, when we played EoE it was for everybody to know.

Yes, can u still point out my graphics, all i see is our title and our buttons on the main site.

You must be blind.

As i stated in my earlier post, this is my first site, i have ever done. How, can anybody expect it to be perfect. I am sure everybody can garantee that is is better than yours. It only proves you to be a bigger idiot, knowing you have done more sites, and they all still look like crap.

Are you still up to the challege to a sniping clan match, or are you going to ignore that question also?

As far as n00bness in the web dev field, n00bness is your site, at least i am attemping to make a nice site. Not a white background with some lines, and links all on the same page, like a TRUE geocities site would be.

Let's refer to what a n00b is... The answer is easy. You are. And accoring to the Renegade community:

What is a n00b (not noob)? The definition we're using on this site is a player who may or may not be new to a game, but insists on doing brainless things, especially things that hinder the team. Those who are defined by this site as "n00bs" will also refuse to listen to words of wisdom or, even worse, berate those who try to help.

Yes, that definition, taken off of http://www.n00bstories.com perfectly describes you.
You insist on doing brainless things.
You hinder the team. (The whole renegade community.)
You can't listen to anything at all. Nevertheless words of wisdom.
Everytime someone tries to help you, you definitely berate them.

You are a perfectly described n00b.

It is inevitable.

If you would rather program all of your own stuff, than were is it? Nothing but defaults. Me, i am learning as i go. Yes the forums and photo gallery are templates, at least they look decent, and i will learn how to do everything on my own.

Like i said, at least i am trying. Unlike some n00bs (Alkaline).

ROFL here is something funny, how do you like haveing a rank of Deleted under your name. I bet, you feel pretty special about that one!!! w00t we should fear the "Deleted" ones ownage.
