Subject: More Problems with RG....
Posted by Scopehunt on Wed, 14 Apr 2004 17:51:48 GMT

Since I got RenGuard I have problem after problem. I'm not moaning because I like RG anyway. But can you help me.

I open C&C Renegade to play it but the RG Screen wont show up [Connecting to server etc...] I Un-Install it through Add/Remove programs and then it's gone, but servers which require RG to play dosn't kick me out. Even after un-installing it. I can't use the Repair button. And even right now, the screen for connection and welcome Scopehunt blah blah blah won't show up. So I've had to re-install it yet again and the problem still persists, any help please
