Alkaline4500 successfull isntalls and 5000 failed un-installs, 6000 renegade re-installs , 100,000 incorrect RG kicks to valid users :rolleyes:
if 100 servers are online, 5 have renguard, keep pushing number up, they only make the situation more hopeless,

Do you have statistics to back that up? No? Then you're talking out of your ass.

Quote:its only a matter of time before you yourself will uninstall it, to which I will just laugh :rolleyes:

Not likely. Nothing has happened that I didn't expect. Even you and other cheaters feeling threatened and trying to sway public opinion.

Quote:ya your buttons and your forum, and your "delete" title under my nick, we all know its all about "your" "your" "your" just like servers would be "yours" when they connect to the RG network :rolleyes:

I don't run RenGuard, my dear. mac runs RenGuard. And we are not taking anything from server owners. In fact, later upgrades to the SSC and BRenBot will allow more and more functionality to the server owners to control what questionable rules they choose to allow (such as crystal scope).
