Im also the one that lives for sniping. The best has to be the 500's. If you miss a shot, it does not make a loud noise or leave a blue beam of the direction the shot came from (thus giving your position away)

However if you out-numbered then the best is either Sakura or Havoc, 2 shot kill but if you die, gives the opposing team more points.

500's take a long time to reload BUT shoots more rapidly.  
1000's Take a split second to load BUT shoots more slowly.
