ppl don't seem to get it that renguard is still being updated and more... it's normal that a program like renguard has some bugs that are very annoying for someone not knowing what to do.

go to the forum and ASK for a sollution instead of saying it's bullshit.

Renguard isn't perfect everyone knows that and the developers know that all to well so let them do there work, tell them what kind of errors you get and what you've tried to fix it.

just saying it's bullshit ain't gonna fix your renguard try asking
