Subject: BRenBot 1.35 and SSC 1.02 released

Posted by mac on Wed, 21 Apr 2004 14:02:03 GMT

I've fixed a RenGuard related WOL Authentification bug, that was causing the last "I get kicked from the Server, but I have RenGuard!" problem..

This bug has been fixed in brenbot and standalone SSC. I fixed this modules-bug in the SSC as well.

No other changes..

Have fun
