RenGuard 1.02 is out. If you had the crashing bug, please download a fresh install from our Downloads page (link on the left) if you can't auto-update.

RenGuard 1.02 fixes several bugs from version 1.02. It also gets rid of dependency of htmlayout.dll, which is an inferior HTML renderer than using your own computer's Internet Explorer.

Please visit our live support chat or the forums if you have any questions.

Please also note that we have released BRenBot 1.35 and SSC 1.02 which fixes the last remaining bugs where a RenGuard user was not being identified as such and kicked.
