I would love to see 100% of servers running RG, however currently I am glad that they don't because I can't play on any RG servers due to 1.02 crashing my Renegade.

I haven't had time to stop by the IRC to get the new 1.02 build from mac, so I am stuck in non-RG servers until the crash bug gets worked out.

I see RG in the future as being a huge link between all players, but it has minor issues. Who would have thought that had I kept my Win98SE and not upgraded to Win2k I wouldn't be having these issues?
