Put compatibility mode on for Windows 98/ME, trust me, I had the same thing happen on my laptop & this comp. Just go to your Renegade directory (after installing RenGuard), right click "game.exe", go to "Properties," then go to "Compatibility." After you do that click the box where it says "Run this program in compatibility mode for:" & then select "Windows 98/ME."

That tends to work for me, I hope it'll do the same for you
