RenxRenAlert has no GSA support at the moment,

I think the problem is how gsa opens "C:\westwood\renegade\game.exe", but we need it to open "C:\westwood\renalert\game.exe" (or whatever dir you chose, you get it).

If and when RA gets GSA support, it will have it's own lobby.

And when is that going to happen? I can't wait to try this mod on multiplayer... it is going to kick ass.

Will the renalert team have to pay for their mod lobby?
