AircraftkillerIf you have textures (notice it's underlined! That means that's the proper term to use! They aren't skins.) in your data directory, delete all \*.dds files and all \*.tga files.

If you deleted anything else, it may cause Renegade to stop functioning.

ACK you whiner lol.

If you tell people to delete textures they go: "What are textures"

And then you tell them: "Delete your skins"

They tell you: "Why didnt you say so in the first place!"
