No one said you were cheating or even mentioned yor clan but you are correct about one thing, it was one gunner and one engineer and you recall that so you must recall that you killed both of them in about 1 second each. Hey maybe they were in the red I don tknow but they died in one second. I also dont care about your screenies cause I hear there is other cheats besides Big Heads. I say fix your Renguard or find out what it is thats kicking you EVERY game. I would think you would not want anyone wondering if you cheated by fixing it like the rest of us. Not one out of the other 11 in that server had problems all the games we had. If one of the BA were getting kicked like that I would hope you would wonder too and tell us to fix our problem. How about trying to unistall Renegade and reinstalling it with new Renguard?

GG's guys

KarelIm the guy in question,
now, before calling me a cheater you have to get a few facts straight:
 - ask any player that knows me, if i cheat. then ask them if i have alot of kills after a match, they will both say no.
 - see on fly sniper server where i sometimes go and check out my recemondations (i have 1)
 - we have 3 out of 4 screenies, and in total of those games i had like 6 kills.
 - you said i killed 2 gunners, i know what buffermap you mean and it was an engenier and a soldier. (dont know wtf your talking about how could there b gunners nobody had enough creds)
 - why not ask me for a screenshot
 - its rude to call ppl cheaters when i just have problems with renguard.
 - if i had cheats installed renguard would say that i have cheats.
 - i often play on servers with renguard, somtimes i have problems, but other players too, it says "... is not using renguard anymore" this is a bug.
 - now if you have any other proof that i "cheat" plz post it here, if not i think an opoligy is in order.
