Somebody on my team today used a bug I didn't know, we were same team and he started shooting my mrls with his mrls. FF was off, but he was killing my mrls... (played on Renguard server where Mac go every day, the one of STUTU clan.)

How can we stop such retarded noobs using bugs ?

he told me he was using poke hack... 'tard !

I have also that kind of bugs since we have blue box on the game...
Don't know if blue box are a renguard feature...
