There is a

l02_dam.w3d   3111752
l02_dam.wlt   17472

And I used the .w3d, which probably isn't a temp file because of its size. But I also tried importing other w3ds and I got the same error message. I am using the w3d.ms script, which gives me this error. the manimporter.ms doesn't work for me, nor other forum members that I've heard ask about it.
