I think it's a very handy feature to have on a server. It would be good to see something like this for the WIN32 FDS too. My clan has a web based system, which has the same features as what MAC is doing. It does come in handy when you want to see if your server is full of n00bs or what map and how much time is left. You can see the one for our server here http://renegade.neurit.de/online .

Excellent Work!
