JzinskyOk then smarty pants, seeing as you're so great tell me this..

1. How do you avoid sniper fire from 7 hillcampers?
2. How do they remain on the server when hillcamping isn't allowed?

ok for #1 its all about skill and knowing the map u name the map, where they were hiding and how they were moving i could tell u how to avoid them.

and for #2 they either had hookups with the host OR were barely in bounds of the rules plain and simple..... any other questions i'd be happy to answer them
