well first one is problem i get... Not sure if you have any ideas - I tell you waht i did to ... try and maybe solve this

First i uninstalled renguard, uninstalled renegade, and installed renegade, put patch in, then installed renguard i still got this message...

I've also did the "safe install" for renguard after i had uninstalled renguard and i still got this same message after it had to update.

I've tried uninstalling renegade/renguard and reinstalling it about 4 times by now... I've never got any other message then the game.exe error message

so if u guys will be happy to help me, plz, thx

if u have windows xp that could be causing the problem

try right clicking on the shortcut for renegade click compatability then select run in compatiblility mode fro windwos 98

well windows 2000 dosent really have anything good u can do to fix problems with most

programs.

try asking one of those renguard expert people
