Where is a list of authorized W3D files that we can download?

Such as weapon vehicle replacements.

I don't think there's a list of ones that RenGuard support *yet*.

Well, that's...irritating.

I wanted to replace the default weapons and use RenGuard, oh well.

You can. Just try. If they aren't authorized, send them in to mac@renguard.com to get them
authorized. It isn't that hard actually.

You can send them in, but that doesn't mean that they will be accepted.

Subject: Reborn W3d Files

OK I have sent 5 W3d files to mac ages ago and it is still not allowing these models. ok I get it.
However, You say you work with reborn but you will not aurthorize the reborn models for
renegade. that makes no sence... its the same thing, all I did was extract the weapon models out
of reborn to use in renegade. I have done this for a LONG time. So Now I just have 2 Renegade
directories, cause I doubt they or ANY other w3d file will EVER be allowed no matter what they
say... I respect them for the effort, but its yours now. you can keep it... I would only ask that you
retract the statement that you will work with reborn, as you do not support their models, unless in
the reborn exe.

OK I'm ranting and I dont mean too... I'm just frustrated that I have to have 2 directories now. one
with renguard and one without.

ingy...
