Woohoo I'm so proud, after so many times of having good experiences with RenGuard, my
RenGuard now automaticly freezes when I try to start it up. I don't get any errors it just freezes.

I'm going to find out now if the problem really is with my RenGuard. If anybody has any good
ideas please tell me.

<Update> Ok simpley re-installing RenGuard 1.02 didn't work. But I read about your Mantis
support system. I will test that out now .</Update>

Also try signing up on the website and getting the beta test version 1.03.
