Okay, I ran another virus checker and found the problem. So far, its found 500 infected files and it's still going up. They're all being fixed and should be safe to download. Oh, and WD, check your mIRC.exe for DS. That's where the virus started according to this ratty little anti-virus program.

I cant risk getting it, because my anti virus program isnt working properly, so what id like to know, is why have you not come to changing whats in the file, as everyone has gotten a virus from it?

everyone is getting the same exact virus, so dont say there is nothing in it...

It's probably going to die, not because of lack of interest; but because of not being all that fun.

Second day playing it and I'm bored. It's just like Renegade, except with some small differences.

Sort of like Renalert. Different units, same tactics, rinse repeat.

And yet I still like it.

RA is totally different than Renegade. The similarities end at some unit names and the style of gameplay, because it's C&C - you can't expect it to be something other than C&C.

SS is different, yet it misses out on the point of "Sole Survivor." That game sucked to begin with, but SS doesn't capture its essence, or how it was played. Basically you get a few levels with a bunch of different game modes, and only a few of them are fun.

I did enjoy playing with the velociraptor for a few minutes, and that extras Buggy with the first person view, but that's about it. The rest is pretty unbalanced, and most of the players I've seen in-game are saying the same things I am.

SR usually does better work than this, but then again, he did do most of this by himself. At the very least, he did try, but from what I know he's not going to patch it.

Which sucks. If he replaced the vehicles with some decent models, replaced the characters, gave it C&C gameplay and such, it'd be a lot more fun.

I personally don't like fucking invincible Tiberium Silos or MCVs. I don't know of anyone else who does, either.

They are only like that because the host forgot to switch the amount of health they regain. Whoever the host is, just has to go into the SSgameset thing, and change in through there.

Dri Reign obviously put a lot of work into this spectacular mod. The thing I like about it is that it has many different game modes, unlike most of the mods out there. Very unique game play, and interesting concept of having a central area for purchasing and getting ready to go out into battle. Good job, Dri Reign.
